OBJECTIVE

A motivated and detail-oriented individual with a strong foundation in AWS cloud services and a passion for cloud computing. Seeking to leverage my skills and knowledge to contribute to a dynamic team as an AWS Cloud Engineer.

PROJECT WORK

➤ Hosting a static website on AWS using S3 bucket

- Configured an Amazon S3 bucket to host static website files.
- Managed bucket policies and permissions to ensure secure access.
- Enabled static website hosting in S3

➤ Web based application for Production environment

- The VPC has public subnets and private subnets in two availability zones
- Each public subnet contains a NAT gateway and a load balancer node
- The servers run in the private subnets, are launched and terminated by using an autoscaling group, and receive traffic from the load balancer
- The servers can connect to the internet by using the NAT gateway
