

ABHISHEK KUMAR

DevOps Engineer Trainee | Cloud Infrastructure & Automation

Greater Noida, Uttar Pradesh, India | abhishek522580@gmail.com | +91 8292938395 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

MCA candidate (2027 batch) with hands-on experience deploying and maintaining AWS cloud infrastructure using Infrastructure-as-Code (Terraform, CloudFormation, Ansible). Skilled in Linux system administration, Git-based version control, Jenkins build automation, and monitoring/troubleshooting production environments. Working knowledge of Docker and Kubernetes fundamentals through self-directed learning. Strong SQL and Python scripting background for automation and data-driven troubleshooting. Seeking a DevOps Engineer Trainee role to apply CI/CD, cloud, and automation skills in a collaborative, process-driven environment.

CORE TECHNICAL SKILLS

- Operating Systems & Scripting: Linux, Bash, Python, SQL
- CI/CD & Version Control: Jenkins, Git, GitHub, build & deployment automation
- Containers & Orchestration (Working Knowledge): Docker fundamentals, Kubernetes basics (self-study)
- Cloud Platforms: AWS (EC2, S3, VPC, IAM, NAT Gateway, Load Balancer, Auto Scaling Groups)
- Infrastructure as Code: Terraform, AWS CloudFormation
- Databases: MySQL, PostgreSQL — query writing, filtering, aggregation, performance-aware queries
- Monitoring & Troubleshooting: system health checks, incident triage, root-cause documentation
- Collaboration & Process: Agile teamwork, runbook-style documentation, status reporting, time management

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Architect Associate — 2025
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate — 2025
- Solutions Architecture Job Simulation — Forage, 2025

RELEVANT PROJECTS

Highly Available Multi-Tier Web Application — AWS VPC & Infrastructure Automation

- Designed and deployed a production-grade, multi-tier application on AWS spanning public and private subnets across two availability zones for high availability.
- Provisioned infrastructure using Infrastructure-as-Code principles; configured NAT gateways and load balancers for secure, scalable routing.
- Implemented Auto Scaling Groups to maintain uptime under variable load, following production-style deployment and validation workflow relevant to CI/CD pipelines.

Customer Data Pipeline & Analysis — Python, SQL & Automation

- Built an automated data pipeline to clean, preprocess, and analyze large customer datasets using Python and Pandas.
- Wrote SQL queries for filtering, aggregation, and extraction to support operational reporting and monitoring dashboards.
- Documented methodology and findings for non-technical stakeholders — directly transferable to incident reports and on-call status updates.

Static Website Hosting — AWS S3 Deployment & Access Control

- Configured and secured an Amazon S3 static hosting environment with bucket policies and least-privilege IAM permissions, reinforcing access-control best practices used in production support.

VIRTUAL INTERNSHIP

EduSkills Academy: DevOps & Cloud Automation (8-week program: Docker, Kubernetes, Terraform, Ansible, CI/CD with GitHub Actions, Monitoring & SRE)

EDUCATION

Master of Computer Application (MCA) — Galgotias University, Greater Noida, UP 2025 – 2027 (Pursuing)

Bachelor of Computer Application (BCA) — Babasaheb Bhimrao Ambedkar Bihar University, Muzaffarpur 2020 – 2023, 78.15%

Class 12th (CBSE) — Shanti Niketan Senior Secondary School, Muzaffarpur 2020, 64.60%

ACHIEVEMENTS & ACTIVITIES

Innovate Bharat Hackathon 2026 — Team Member, Team CortexCraft (SISIS140), Sharda University

- Collaborated in a cross-functional hackathon team to build and present a software solution under time pressure, demonstrating teamwork, fast problem-solving, and ownership.
